Muzaffer Can Kaplan

+90-542-1959509 | muzafferckaplan@gmail.com | Ankara, Turkey

Summary

- As a frontend developer, I am responsible for building and shaping the user experience of websites and web applications. I do this by using a combination of HTML, CSS, and JavaScript to create the visual and interactive elements of these applications.
- One of my key strengths is my ability to translate design mockups into code. I also have experience making my code responsive, so that it looks and works well on a variety of devices.
- I am always looking to stay up-to-date with the latest technologies and best practices in the field of frontend development. In my free time, I enjoy learning about new frameworks and libraries, such as Next.js, Tailwindcss, Typescript.

Experience

Front End Developer | 11/2022 - Present | Deep Control Technology | Ankara, Turkey
- Designed and updated layouts to meet usability and performance requirements.
- Produced websites compatible with multiple browsers.
