Muzaffer C. Kaplan

Frontend developer

I am a Frontend Developer specializing in React, with a passion for creating user-friendly and responsive web applications. My experience with React also includes using tools such as Redux, React Router, and Styled Components. Collaborating with designers, project managers, and backend developers, I work to deliver customized web applications and sites that meet the specific needs of clients. I stay up-to-date with the latest developments in React and use the most appropriate tools to complete projects on time and within budget.

Experience

Nov 2022 - Present
Deep Control Technology | Ankara/Turkey

Frontend Developer

As a Frontend Developer at Deep Control Company, I worked with a team to create engaging and responsive web applications using React. My responsibilities included:
- Writing clean, efficient, and reusable code using best practices
- Developing new features and improving existing functionality
- Collaborating with backend developers to integrate APIs and database systems
- Conducting code reviews and ensuring code quality and consistency across the team
- Participating in sprint planning, daily stand-ups, and retrospectives

Sep 2022 - Nov 2022
Viveka · Full-time | Ankara/Turkey

Frontend Developer

As a Frontend Developer at Viveka Company, I created modern and user-friendly web applications using React and Next.js technologies. My responsibilities included:
- Using Next.js server-side rendering feature to improve web application performance
- Writing code with React, HTML, CSS, and JavaScript using best practices for usability, performance, and reliability
- Making necessary changes to develop new features and improve existing functionality
- Interacting with various backend systems including APIs and databases
- Conducting user experience tests and optimizing website performance

Sep 2022 - Oct 2022
Patika.dev Popupsmart React Practicum | Ankara/Turkey

Frontend Developer-Practicum

As a Frontend Development intern at Practicum, I worked on various projects to enhance my skills in web development. My responsibilities included:
- Collaborating with team members to build responsive web pages using HTML, CSS, and JavaScript.
- Writing clean, efficient, and maintainable code to implement new features and improve existing ones.
- Following best practices and coding standards to ensure consistency and readability of the code.

Personel Projects

1-ToDo
2-Weather App
I learned how to share state properly across and how to fetch and catch data using context.
3-Personal website
I learned and learned how to design with tailwind.
4-Fitness App
I learned how to fetch and catch data using.
